

PURE GOLD™

PRECISION TOOLED PREMIUM SHOTGUN CHOKES
"Put More X's On Your Card!"

Our sporting clays chokes are designed to give you dense patterns with fewer holes in the pattern where birds can be missed. All of our chokes are ported away from the shooter so there will be no powder residue blasting back at you. The porting is designed to strip the wad from the shot column and, additionally, will keep the muzzle jump down to gain quicker response on following shots. All Pure Gold chokes are made from top grade 17-4 heat-treated stainless steel that is made in the USA.

Since they are longer than your normal aftermarket tube, our chokes generally shoot one choke tighter than our competitors. Why? Because we have a longer forcing cone with a flatter taper angle. This helps reduce pellet deformation, which causes "flyers". So generally speaking, if you like to shoot an IC, you can back up to a Pure Gold skeet choke and see the same performance; give or take a few pellets. We have shooters say all the time, "Man they sure do smash targets!" All Pure Gold chokes are guaranteed. If you are not completely satisfied with the choke in any way, return the product(s) for a complete refund.

12 Gauge Gun Models:

PURE GOLD ACCESSORIES

PURE GOLD QUICK RELEASE BOLT CLOSURE

Are you tired of wearing your thumb out on that factory bolt closure? Well, we have a perfect solution for you. Pure Gold's Beretta AL390-391 replacement quick release bolt closure is a must for shotgun sport shooters and avid hunters on the move. Our quick release button is not only the easiest to operate, but is also the most attractive on the market.

PURE GOLD SHELL RELEASE

How about that little button on the bottom of the trigger group assembly? Do you have trouble finding it? Do you have large fingers that get pinched by the shell door? In cold weather, do your gloves make it hard to handle? Well, we've fixed all of that. We have a replacement shell door pin that extends farther making it easier to access and handle.

PURE GOLD QUICK RELEASE TRIGGER PIN

Is your trigger group pin difficult to remove? Our replacement trigger pin is highly polished to a mirror finish with knurling along the side, making it easy to grip and remove. Just grab it and pull; it's that easy. A little something to make your cleaning or quick trigger group changing a snap.

PURE GOLD BOLT PULL

We have also manufactured an extremely nice bolt pull for added comfort and looks to your Beretta shotgun. Gives you a good smooth, clean feel when pulling back the action.
